* - Tab for contracts *
- Tab for resourse   different tab.
- Tab for role

• each resource is linked to a
  contract
• each contract is linked to a
  role ~~show if it's active by default~~
• each role is connected to billing
  ✓

resource:
  - EID → connected to contact

Contract: (is it by name or ID number)
  - Contract (name / ID) → connected to roles
    • in contract will
      ~~be footed if~~ display   → is each
      ~~that to be~~ it's   contract have
      active by default   a different
          ↓   series of roles
    otherwise have to
    change manually   By active: ↗ when
                                                they
                                 means that it   starte
    will each contract   being worked on
    have a drop down
    menu for what   ┌ By deactive
    role is ~~tak~~ being   │ means that it is
   done   │ no role is on it
                                 V
                                If it's deactive do
                                we need to add
                                Start & end

role ———→ volume of the role

how much role "Budget"

is the roles
Budget just
the general   each
idea   role uses
          different amount
          of money.

money used
by that role

that will be
input ~~automatic~~
manually

↳ down the
road we
will have
that updated
automatically

• side note:
  - will we have
  a way to back
  in each page.
  ~~-example we~~
  ~~have multiple~~
  ~~contracts and~~
  ~~we chose~~
  - or is it just
  tabs that we
  click

• will the roles
be connected to the
resource name?
